# RegDelta™

The **gold standard** for **AI-powered** control over regulatory obligations.

Visit **regdelta.jwg-it.eu** for more information.

Trusted Regulatory Intelligence

RegDelta gives your enterprise the power to scan the horizon and configure your obligations into a single business truth. Unlike any other provider, we use NLP to determine relevance from millions of alerts, enrich every document with a deep, proprietary model for FS obligations and deliver them to your instance in under 3 days.
Powered by **JWG regulatory analysts**, we use highly advanced tools to scan, scrape and enrich content; helping businesses understand and manage regulatory risk in a more efficient and economic manner.

RegDelta™

The **gold standard** for **AI-powered** control over regulatory obligations.

Ever-growing mountain of regulatory demands

Finding the right balance between meeting internal cost-saving objectives, while keeping on top of an ever-growing mountain of regulatory demands is presenting the opportunity to digitize compliance obligation management.

380,000 pages of new FS regulations

In 2020 alone, JWG filtered over 700,000 events from 700+ regulatory publishers. RegDelta is on-track to have a year-end total of over 490 legislative initiatives with 25,700 documents with over 380,000 pages and 125 million words. This is over a 300% increase from 2019 as COVID has unleashed a second wave of global regulatory reform.

Use technology to mitigate risk

Missing a single update can cause a disproportional loss if the firm fails to spot a regulatory change and action it appropriately. To mitigate this risk, financial institutions need to digitise their operating models with RegTech which creates as single view of the regulatory truth throughout their organisation.

RegDelta™

RegDelta AI-Powered natural language technology platform

Our industry leading RegDelta platform hosts a semantic rule book for regulators, financial institutions and technology companies. RegDelta uses AI-enabled NLP to help humans make intelligent decisions about their compliance obligations. In addition to hundreds of NLP tags, each document is enriched with 12 metadata fields by JWG analysts, allowing users to navigate vast libraries in a seamless workflow.

Experienced

JWG has over 14 years' experience in working with market leaders to navigate and interpret regulatory change

Trusted

Underpinned by experts who crowdsource regulatory pain points and solutions, the platform is fit for purpose and evolves in line with business needs

Proven

RegDelta was built by the banks for the banks, and has since been deployed globally within many financial institutions
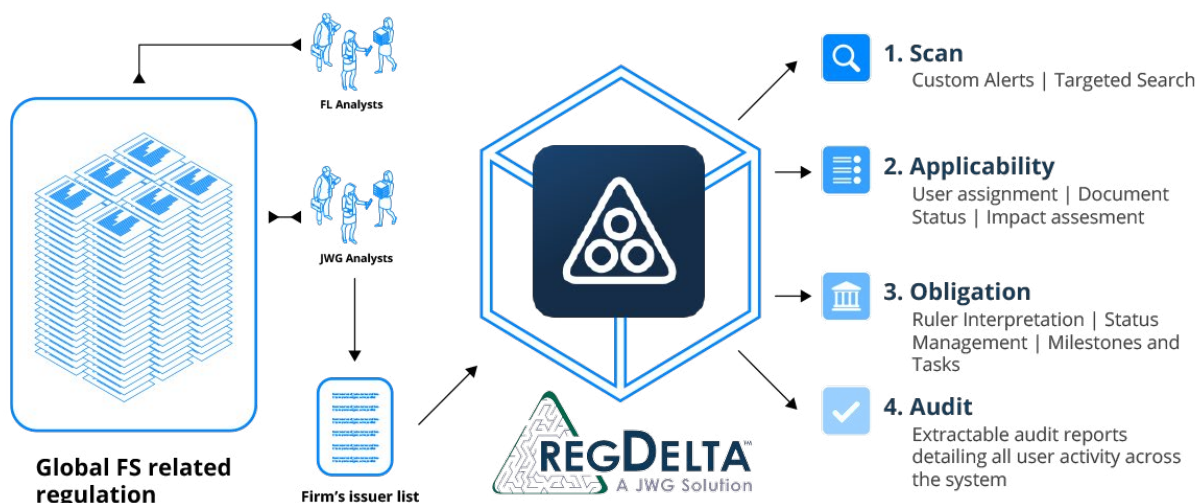

Golden Source

RegDelta has the highest quality, best structured full-text library covering publicly available, client and 3rd party content

Fast SLA's

Fast SLAs mean firms get up-to-date regulatory alerts. JWG analysts currently provide 35% of documents the same day they were published

Global coverage

RegDelta currently supports 12 non-English languages. We offer proven translation for non-English documentation.
